# INSTALLATION INSTRUCTIONS

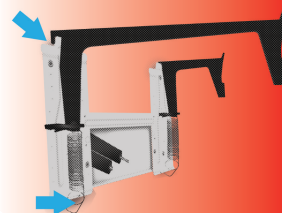

**HANDLES UNITS UP TO  
30,000 BTUs**

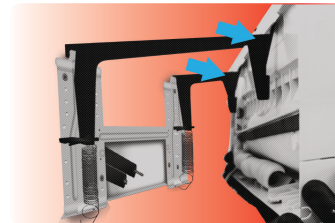

**1** Align the evaporator mounting plate correctly and secure it firmly to the wall.

**2** Facing the wall, attach the SMALL WIZ bracket onto the hook on the upper RIGHT side of the mounting plate and secure it to the bottom of the mounting plate with the spring hook.

**3** Then, hook the large WIZ bracket onto the upper LEFT side of the mounting bracket and secure it to the bottom of the mounting plate with the spring hook.

**4** Check that both brackets are firmly seated and, using the hanging inserts on the evaporator, hook it onto both WIZ brackets.

**5** TO REMOVE: Support the evaporator with one hand, remove the 2 WIZ brackets and secure it onto the mounting plate.
